| <h2>PRODUCT FEATURES</h2> |
|---------------------------|

Isopropyl Myristate (pronounced meer-is-tate) is also a fantastic, no-odor/non-toxic solvent for Monster Clay. It tends to dry a little slower than other solvents like Mineral Spirits, but it dissolves the clay very aggressively and is a great smoothing agent. Use sparingly with a soft brush and move on to different areas while the solvent evaporates.

For polishing Monster Clay to a glass-like surface, start with a smooth area like top of a head. Apply a small amount of myristate to a clean paper toweling and rub in a circular fashion until the clay takes on a shiny surface.

USE SPARINGLY!

The safety data sheet (SDS) for this or any Monster Makers product should be read before using and is available on request. All Monster Makers products are safe to use if directions are read and followed carefully. **Keep Out of Reach of Children.**
